

Message to Resident – 5/4/2020

On Top of the World remains committed to the safety of our residents. We continue to monitor the data from Pinellas County, the CDC and the Florida Department of Health as well as reviewing the recommendations and guidelines from the Governor's Reopen Florida Task Force, before any final decisions are made for reopening. The goal is to return to full operation as soon as possible, but the safety of our residents and employees must remain our #1 priority.

Be assured, OTOW is preparing for many uncertainties and the expectation of limited openings for some outdoor amenities is in process for mid-May. All stages of reopening have a specific set of safety procedures and guidelines for residents to follow and will be posted on the [otowclearwaterinfo.com](http://otowclearwaterinfo.com) website, on channel 732, on RAVE alerts and posted at all SCA facilities. The list of outdoor amenities that will be scheduled to reopen on a limited basis will be posted to the above listed places as soon as possible.

We would like to open the amenities earlier than our **May 11<sup>th</sup>** target date, however, we have on backorder several items used for your safety and for the safety of our staff. Included in our order are additional face masks, gloves, sneeze guards, hand sanitizer and dispensers and disinfecting machines and chemicals, among other things.

What facilities will reopen after this phase, the number of people that may gather and what protective gear may be required, are all part of the unknowns for all of us. What is clear about the virus is that it is much more likely to spread when people are in close proximity to others. What we do know and send sincere thanks and appreciation for, is for each of you doing your part to help defeat this Covid-19 coronavirus. Thank you!
