EXHIBIT B**SCA UTILITIES WASTEWATER COLLECTION & RECLAIMED WATER
DISTRIBUTION SYSTEM**

The SCA Utilities Wastewater & Reclaimed Water System is located within the Community and generally includes a domestic wastewater treatment plant, four (4) wastewater pump stations, a reclaimed water storage facility, and a reclaimed water high service pump station. Wastewater is collected from the Condominiums and related facilities within the Community through sanitary sewer laterals and conveyed through sanitary sewer gravity mains located throughout the Community Property and other amenity and service areas. The wastewater then discharges into a wastewater pumping station, also known as a lift station, where submersible pumps withdraw the wastewater from the wet well and discharge the wastewater into a sanitary sewer force main that discharges into a sanitary sewer manhole connected to a sanitary sewer main ultimately discharging to the master wastewater pumping station located at the Wastewater Treatment Facility. The master wastewater pumping station then pumps the wastewater into the Wastewater Treatment Facility where the treatment process begins. The wastewater is treated to meet the requirements as detailed in the Florida Department of Environmental Protection (FDEP) operating permit allowing the effluent (now referred to as "Reclaimed Water") to be utilized as irrigation quality water in public access areas. The Reclaimed Water is conveyed through reclaimed water transmission mains to the 2.4 Million Gallon Ground Storage Tank (GST) where the Reclaimed Water is stored for future use as irrigation quality water to be utilized on the golf course, common elements and other beneficial use areas. The Reclaimed Water High Service Pump Station (HSPS) is designed to maintain system pressure to these areas and withdrawals the reclaimed water from the GST as necessary to maintain system pressures and irrigation demands in the reclaimed water distribution system. The reclaimed water is discharged from the HSPS and is conveyed through reclaimed water mains where reclaimed water service lines are connected ("Tapped") into the reclaimed water mains allowing reclaimed water to travel from the reclaimed water mains to the Association Irrigation System to irrigate the common elements and other beneficial use areas and the golf course irrigation system to irrigate the golf courses.

The SCA Utilities Wastewater & Reclaimed Water System is specifically described by the State of Florida Department of Environmental Protection Domestic Wastewater Facility Permit No. FLA012905 as follows:

TREATMENT FACILITIES:

Operation of an existing 0.600 MGD Annual Average Daily Flow (AADF), Type I Ludzack-Ettinger process domestic wastewater treatment plant consisting of: an on-site influent pumping station of 6,170 gallons, one manually-cleaned fine screen, influent flow splitter box, one equalization basin of 208,000 gallons with diffused aeration, two anoxic basins of 124,000 gallons total volume, three aeration basins of 600,000 gallons total volume with diffused aeration, two clarifiers of 173,400 gallons total volume with 1,924 square feet of total surface area, four filter cells of 256 square

feet of surface area, a 3,400-gallon filter backwash pumping station, two chlorine contact chambers of 60,000 gallons total volume, using sodium hypochlorite liquid system. Waste activated sludge is piped to one aerated digester of 75,000 gallons from where it is transported to a permitted Residuals Management Facility for further treatment and disposal.

Reclaimed water which does not meet Part III Public Access quality standards is transferred from reject pumping station No. 1 to the reject storage prior to routing to the headworks for retreatment through reject pumping station No. 2. Reject storage includes one aboveground tank of 0.43 MG capacity.

REUSE:

Land Application: An existing 0.600 MGD AADF permitted capacity Part II slow-rate public access (R-001). R-001 consists of a 2.4 MG ground storage tank with a 27-hole golf course and residential landscape irrigation.
